About Me

BSIT graduate and aspiring full-stack developer with experience in building responsive applications, integrating AI features, and performing manual testing. Skilled in debugging, problem-solving, and delivering reliable digital solutions through real-world projects.

Skills and Achievements

- **Full-Stack Development:** Modern frameworks for scalable web apps
- **AI Integration:** Enhancing application functionality
- **Testing & Debugging:** Bug reporting and documentation
- **Code Review:** Detail-oriented analysis and error detection
- **Collaboration:** Communication, teamwork, and time management.

Education & Qualifications

- 2021 - 2025 **Systems Technology Institute (STI)**, Cainta Rizal
- 2015 - 2021 **Binangonan Catholic College (BCC)**, Binangonan Rizal

Project Work / Work Experience

Freelance Full-stack Projects (November 2025 – February 2026)

- Developed a responsive website and mobile app, enabling users to access courses, track progress, and interact with learning content seamlessly.
- Implemented basic n8n workflows for AI chat-bot, automating notifications, data collection, and user management processes.
- Integrated AI features for content recommendations and smart user assistance, enhancing user experience and engagement.

Sports Analyst (BPO) – Telework PH (June 2025 – November 2025)

- Analyzed live and recorded volleyball, football, and basketball matches to collect accurate game data and statistics.
- Tracked player performance, scores, fouls, and in-game events for reporting systems.
- Ensured data accuracy and consistency under time-sensitive conditions.
- Collaborated with team members to review matches and verify statistical reports.

Lamina Studios Internship (February 2025 – May 2025)

- Conducted manual testing on game builds, identifying bugs, glitches, and performance issues, while documenting findings in clear test reports.
- Provided feedback on game mechanics, user experience, and design, contributing to improved gameplay and player experience.
- Collaborated with the development team on scripting, NPC behavior, and basic design implementations to support smooth game flow.

Career Development (LMS) - Capstone Project (2024-2025)

- A website designed to help students manage their learning progress by offering a comprehensive platform where they can access educational resources and monitor their improvement over time.

Technical Skills

- **Languages:** Java, C#, Python, PHP, JavaScript, TypeScript
- **Frontend:** HTML, CSS, Tailwind CSS, React
- **Backend:** Node.js, Laravel
- **Frameworks, Architecture & Technologies:** Flutter, Unity, MVC, MVP
- **Database & Tools:** MySQL, Git, n8n, XAMPP, WAMP

Achievements

- **Developed full-stack projects**, building scalable web applications using modern frontend and backend frameworks.
- **Integrated AI tools and APIs** into applications to enhance functionality and improve user experience.

Interests

- **Collaborative & Independent Development:** Experienced in building scalable applications and integrating AI solutions both in teams and independently.
- **Full-Stack Expertise:** Proficient in modern frontend and backend technologies, cloud deployment, and development best practices.
- **Testing & Debugging:** Adept at diagnosing and resolving software issues to ensure reliable, high-quality applications.
